Checklist for install

LyricFlash case · design v10.1

Unit / print: _____ Base style: ribbed / panels / smooth, cleat: yes / no Date: _____

☐	**1** Magnets: all 8 seated flush, each shell magnet attracts the base magnet under it	OK / one loose (glued) / wrong way round
☐	**2** Switch: presses into the wall firmly, knob stands out and slides end to end, cuts power	OK / too tight / loose / rubs
☐	**3** Battery goes in and comes out by hand, no forcing; doesn't rattle when closed	OK / tight where / rattles
☐	**4** Board screws to the plate with the 3 M2 x 3; heads flush in the countersinks	OK / proud / stripped
☐	**5** Board + plate go in USB-C first and settle on the posts without forcing	OK / rubs where
☐	**6** Three M2.5 x 6 bite and hold; plate doesn't move	OK / stripped / plate rocks
☐	**7** Shell: seats flush all round, magnets hold it firmly, comes off by hand, no rattle	flush: y / gap where · hold: firm / weak / too strong
☐	**8** USB-C mouth flush with the face, gap even all round	sunk / level / slightly proud / clearly proud · gap even: y / touches where
☐	**9** USB-C opening top edge printed clean	clean / droops
☐	**10** Plug a cable in 20 times while holding the case	board moves: no / yes
☐	**11** Mics: play a song from ~1 m, LyricFlash identifies it as reliably as with the bare board	same / worse / much worse
☐	**12** Cable cleat: one turn holds; a light tug from any side doesn't pull on the plug, slide or tip the case	OK / slips / too fiddly
☐	**13** Touch works right to the edge, no lit pixels hidden by the lip	OK / hidden where
